Biology

The strangest things go through the mail room on the way to the Biology department. Cans of worms – boxes of frogs – crates of turtles – all destined to aid in the departmental study of the secrets of life. The broad scope of plant and animal study, including Genetics and Ecology, is becoming increasingly important as man continues to invade nature's wilderness.

Chemistry

Chem Lab . . . three bewildering, fantastic hours of experimentation in the world of matter (whatever that is) attempting to show that a measure of order and meaning can be obtained from our otherwise baffling observations of the world around us. The Ecumenical Campus Ministry is a cooperative effort by eight religious bodies attempting to relate the Christian faith to the life of the MSC campus. Through its ministers it offers spiritual counseling and guidance. Through the Student Movement it offers opportunities for seeking understanding, dialog in important areas of life, experimentation with designing worship experiences and models for the Church. ECM represents the Church in a relevant way to the campus community.
